Bread and Bullets by George A. Akerlof, Dennis J. Snower ... Standard economics omits the role of narratives (the stories that people tell themselves and others) when they make all kinds of decisions. Narratives play a ro. How many bread slices would it take to stop a bullet? r ... Since the bread is 1cm thick, and we know the density of the bread to be .025kg/cm³, the mass of the affected bread at the bullet hole would be: .025kg/cm³ * .00636cm³ = .000159kg. Then, we can go to this calculator to figure out the final velocity of the bullet after it hits the first slice of bread. Since the bread is not being destroyed, and it doesn't really have anywhere to go, we're going to assume that it joins up with the bullet and the bullet and bread continue on to the next slice.
